Guardant Health – USA

Investors: SEQUOIA, OrbiMed, khosla ventures, LIGHTSPEED VENTURE PARTNERS

For patients with advanced cancers, targeted therapies can provide promising new treatment options. But without a clear genomic picture of your tumor DNA, these therapies are out of reach. **Guardant360** provides this picture with a simple blood draw.

TECHNOLOGY MATURITY

U.I. for Wearables & Sensors: TRL 4, prototype in lab environment U.I. for Smart Apparel: TRL 5-6, prototype in relevant environments
Wearables in general: TRL 7 or higher

INTERESTED IN

Joint tech development / R&D collaboration, Research sponsorship or funding, Partnerships - e.g. grant applications like NSF, DOE or EU projects, Consider an investment (equity or other).

COMPANIES/R&D GROUPS RECOMMENDED:

"There are very many including big names like Samsung with IMEC behind them, and then you have very many more clinical facing like TOMAZ and then consumer facing like Polar. However VERY FEW to none are looking specifically at elderly and few are addressing NFC based approaches aimed at military triage or Ebola type situations."
